A Dementia Friendly Community is a place where people living with dementia are understood, respected and supported; an environment where people living with dementia will be confident that they can contribute to community life. In a Dementia Friendly Community, people will be aware of and understand dementia, and people living with dementia will be included and have choice and control over their day-to-day lives and level of engagement.

If you are a Person living with dementia or a CarePartner/Caregiver we want to hear your experiences, challenges and ideas on making the Hamilton and Haldimand communities Dementia Friendly.

We are scheduling 1:1 interviews with:

- persons living with dementia (self-identifying or diagnosed) &/or persons providing direct care in a caregiving role to someone living with dementia
- individuals who live in either Hamilton (including the GHA) or in Haldimand County
- people who have the ability to communicate via phone or zoom for a minimum of 30 minutes (interviews will be facilitated in English, however translation services can be provided)
- participants must be able to access a phone (accessibility accommodation, tools and additional assistance can be provided if needed)

Interested or have any questions?
